PROFILE

Senior Product Manager with 15+ years shipping consumer mobile products end to end on the **App Store** and **Google Play** — from concept and MVP scope through launch, store operations and live iteration. Works hands-on with data: finds where users drop off, turns those insights into concrete improvements and ships them quickly. Currently building and running an independent mobile app, preparing its first Google Play release. Comfortable operating autonomously in ambiguous, fast-moving environments.

Key results: 40% D1 / 20% D7 retention in early testing, built from progression funnel and behavioural analysis · 4.5/5 average post-launch rating across products delivered with global partners · App Store top-grossing Top 10 within 24 hours of launch.

Core strengths: **Mobile app shipping & live iteration** — App Store, Google Play, WeChat & ByteDance platforms · **Activation & retention** — new-user journeys, funnel optimisation · **Analytics** — funnels, cohorts, A/B testing, hypothesis validation, impact measurement · **User insight** — review and feedback analysis, hands-on testing of live apps · **Roadmapping & prioritisation** — scope trade-offs, fast execution under deadlines · **Cross-functional leadership** — engineering, design, data and QA across time zones.

EXPERIENCE

Independent Product Builder — Cardbud (AI-powered learning app)

Jan 2026 – Present · Lyon, France

Independent side project, owned end to end — currently preparing an Android closed-testing release.

- Conceived, built and operate the app single-handedly — problem definition, onboarding, feature prioritisation, instrumentation and release.
- Run the release loop independently — Play Console setup, closed-testing track and store presence; stack: React Native, FastAPI, OpenAI & Whisper APIs, PostHog.

The Sandbox — Senior Producer (Product Ownership)

Apr 2023 – Oct 2025 · Lyon, France

User-generated virtual world with its own virtual economy.

- Owned product definition and roadmap for complex products with global partners; led distributed product, design, engineering and QA teams across time zones.
- Prioritised live-product improvements from user feedback, behavioural signals and quality reviews — achieving an average post-launch rating of **4.5/5**.
- Projects: The Voice, Cirque du Soleil, The Little Prince, Chupa Chups, Hell's Kitchen.

Voodoo — Senior Producer (Web & Social Products)

May 2022 – Dec 2022 · Paris, France

The #2 mobile publisher worldwide — 6 billion downloads, 300M+ monthly active users.

- Adapted proven mobile concepts into browser-based products, defining platform-specific UX, interactions and MVP priorities.
- Managed multiple concurrent products — scope, budgets, quality standards, dependencies and external development teams.

i4Player — Senior Product Manager

Nov 2018 – Jan 2021 · Shenzhen, China

Start-up building free-to-play consumer products for social platforms.

- Owned the product end to end — target audience, core loop, MVP scope, launch roadmap and live iteration.
- Reached approximately **40% D1 and 20% D7 retention** in early testing; analysed progression funnels and behavioural data to prioritise subsequent experiments.
- Launched and operated across Google Play, WeChat and ByteDance platforms.

Anyfun Studio — Lead Producer | Product Manager

Apr 2016 – Nov 2017 · Shenzhen, China

Studio building a licensed 3D MMORPG, published by iDreamSky.

- Defined the initial product vision and gameplay direction; built and led a 30+ person multidisciplinary team from concept through launch, improving decision flows and removing production bottlenecks to ship on time.
- The product entered the **App Store top-grossing Top 10 within 24 hours** of launch and was rated "S-class" by the publisher.
- Partnered with the publisher to prioritise live-operation content and post-launch changes based on user feedback and engagement signals.

FunPlus — Senior Product Manager, Live Product Growth

Jul 2015 – Apr 2016 · Beijing, China

Game developer and publisher — 2,000+ employees, 25+ studios worldwide.

- Owned live product strategy for a large-scale consumer platform; used behavioural data to identify improvement opportunities and re-prioritise the roadmap.
- Defined and shipped a social feature end to end — hypothesis, user experience and success measures — which drove a **+40% month-over-month increase in monthly revenue** in its first month.

Gameloft — Producer / Game Designer

Apr 2009 – Mar 2015 · Shenzhen, China

- Producer (2011–2015): defined product scope, feature priorities and success metrics from concept through live operations; led a 13+ person cross-functional team, trading off user experience, commercial goals, technical feasibility and production constraints.
- Designer (2009–2011): designed gameplay systems and player flows, wrote implementation specifications and partnered with engineers to improve internal design tooling.
- Projects: Splinter Cell, Where's Wally, LINE Golf, Fashion Icon.

VTech — Product Designer

Sep 2004 – Mar 2009 · Shenzhen, China

Global leader in electronic learning products.

- Designed interactive learning products for licensed IPs — Mickey Mouse, SpongeBob, Winnie the Pooh — translating user needs into detailed specifications with engineering, art and QA.

EDUCATION

Executive MBA — emlyon business school 2021 – 2022

Strategy · Digital Marketing · Emerging Business Models · Organisational Transformation.

BA, English Literature — Hunan University of Science and Technology 2000 – 2004
